PRODUCT INFORMATION

VENTURI is a highly concentrated, multifunctional spray adjuvant intended for use with herbicides, insecticides, fungicides, plant growth regulators and fertilizers. *VENTURI* may also be used with soil applied herbicide to increase deposition. *VENTURI* is a non-ionic surfactant and highly refined paraffinic oil which also includes functioning agents to improve penetration and deposition. When used as directed, *VENTURI* maximizes the activity and effectiveness of pesticides. *VENTURI* can be used when the pesticide label requires a crop oil concentrate. Care must be taken in treating sensitive crops during periods when plants are subjected to drought stress, high temperatures, and high humidity. The addition of an adjuvant to some pesticides or pesticide tank mix combinations may cause phytotoxicity to the foliage and/or fruit of susceptible crops. Prior to the addition of *VENTURI* to spray tank mixes or prior to the use of *VENTURI* with a pesticide or fertilizer where an oil concentrate adjuvant is not specifically recommended but not prohibited by the manufacturer, the applicator or application advisor must have experience with the combination or must have conducted a phytotoxicity trial.

DIRECTIONS FOR USE

VENTURI may be applied by Ground, CDA, Aerial or Aquatic spray equipment. In most cases, use enough *VENTURI* to allow for uniform wetting and deposition of the spray onto leaf surfaces without runoff.

Not for aquatic use in Washington.

GROUND, AERIAL, LOW VOLUME, CDA: Use 4-8 pints per 100 gallons of spray solution or 0.50-1.00% v/v concentration.

The above use recommendations are considered to be adequate for most uses. Some pesticides, however, may require higher rates for optimum effect.

Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over **DIRECTIONS FOR USE** referred to on this label.

NOTE: DO NOT mix with oxidizing agents unless oxidizing agents are in solution.

MIXING

Prior to any pesticide application all spray mixing and application equipment must be cleaned. Observe and follow all cleaning directions on the pesticide label.

Fill spray tank one-half full with water and begin agitation. Add pesticides and/or fertilizers as directed by labeling or in the following sequence:

1. Dry flowables or water dispersible granules
2. Wettable powders
3. Flowables
4. Solutions
5. Emulsifiable concentrates
6. Continue adding water
7. Add *VENTURI* last and continue agitation.

STORAGE AND DISPOSAL

STORAGE: Store product in original container only, away from other pesticides, fertilizers, food or feed. **DO NOT** use, spill, or store near heat or open flame. Keep this container closed when not in use and take care to prevent any water from being introduced to the contents of this container.

Avoid storage below 32 °F. If *VENTURI* is stored below 32 °F, it may become cloudy and thicken. Above 32 °F, *VENTURI* returns to its normal clear fluid state.

DISPOSAL: Wastes resulting from the use of this product must be disposed of on-site or at an approved waste disposal facility. Dispose of contents / container in accordance with local / regional / national regulations. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.
