PRODUCT INFORMATION

IVC 5150 is a penetrant and acidifier. When used as a surfactant, *IVC 5150* enhances the activity and effectiveness of agricultural chemicals by decreasing surface tension of spray solutions and providing more uniform coverage of the target surface. *IVC 5150* also has penetrating qualities improving uptake by the target. *IVC 5150* can be tank mixed with agricultural chemicals such as acaricides, defoliants, desiccants, fungicides, foliar nutrients, herbicides, insecticides and plant growth regulators. *IVC 5150* may also be used as an acidifier to lower pH of spraying solutions to prevent alkaline hydrolysis of pesticides sensitive to high pH.
