PRODUCT INFORMATION

INVADE HC is a highly concentrated, multifunctional MSO-based spray adjuvant developed as a penetrating surfactant concentrate with superior wetting and penetrating characteristics. **INVADE HC** is designed as a replacement for non-ionic surfactants and crop oil concentrates in liquid spray mixtures. When used as directed, **INVADE HC** maximizes the activity and effectiveness of certain herbicides in post emergence applications.

Therefore, care must be taken in treating sensitive crops during periods when plants are subjected to drought stress, high temperatures, and high humidity.

DIRECTIONS FOR USE

Use **INVADE HC** at a rate of 4-8 oz./acre as a replacement for non-ionic surfactants and crop oil concentrates. The high end of the recommended use rate may be necessary during periods when plants are subjected to extreme stress or weed populations.

The addition of a liquid fertilizer (28-32% nitrogen solution) may also be required to improve control under extreme environmental conditions.

Always add **INVADE HC** last to the spray mixture and provide good agitation.

Prior to use, read and follow all directions on this label and on the label of the pesticides being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over **DIRECTIONS FOR USE** referred to on this label.

NOT FOR AQUATIC USE.

STORAGE AND DISPOSAL INFORMATION

STORAGE: Store product in original container only, away from other pesticides, fertilizers, food or feed. **DO NOT** use, spill, or store near heat or open flame. Keep this container closed when not in use and take care to prevent any water from being introduced to the contents of this container. Avoid storage below 32 °F. If **INVADE HC** is stored below 32 °F, it may become cloudy and thicken. Above 32 °F, **INVADE HC** returns to its normal clear fluid state.

PRODUCT AND CONTAINER DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **DO NOT** reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org.

Decontaminated containers may also be disposed of in a sanitary landfill.
