PRODUCT INFORMATION

INVADE RST contains a distinct, high-quality combination of methylated soybean oil and organosilicone surfactant. The oil is a superior penetrant that aids certain pesticides in moving through the waxy cuticle of plants and leaves for greater efficiency. In addition, the organosilicone surfactant increases spreading and wetting of the applied solution so that the active moves to and through the plant quickly. Use **INVADE RST** wherever a label calls for an MSO or MVO and allows or does not exclude the use of an organosilicone.

DIRECTIONS FOR USE
