PRODUCT INFORMATION

REVAMP contains a combination of ammonium sulfate and an electrolyte-stable surfactant system in a convenient liquid form. The low foaming system at the recommended use rates delivers the AMS and surfactant required by glyphosate, glufosinate and many other pest control products. By reducing hard water interactions, increasing uptake and spreading, all at the same time, **REVAMP** significantly increases the performance of most pest control agents.

DIRECTIONS FOR USE

Use **REVAMP** at a rate of 2.5 to 5 gallons per 100 gallons (2.5% to 5%) of tank mix. Add according to the directions on the pesticide label. If no directions are provided, add this product when directed to add ammonium sulfate.

***NOTE:** the use rate of 2.5% provides the equivalent of 2 quarts of surfactant blend per 100 gallons of tank mix)

The use rates described above meet the surfactant and AMS requirements of such products as Roundup® Original and other similar products. These rates will deliver 8.5 to 17-pounds of AMS and 0.5 to 1% of wetting agent per 100 gallons of spray solution. **DO NOT** mix this product with concentrated oil or lecithin based adjuvant products before adding to the tank mix. Add these two kinds of products separately to the tank.
